Customer Requested Relocation, Modification or Abandonment of Existing Gas Service or Meter Set Assemblies

Thank you for contacting Corning Natural Gas Corporation (CNGC) regarding your request to have CNGC relocate, modify or abandon an existing gas service or meter set assembly.

A planner will make a site visit to review your request and may contact you if needed. For service abandonment requests, please inform our Planner of your future plans for this site. You will be provided an estimate for the cost to perform the work you have requested.

The customer shall be responsible for all costs CNGC will incur for this work including but not limited to labor and materials. To help reduce costs, it is possible the customer could perform some of the work such as trenching/excavating for the new facility.

The customer is responsible for final restoration including raking, grading, rock removal, seeding, foliage replacement and watering over the disturbed area. CNGC will leave the area in a condition ready for final restoration.

If you have any questions please do not hesitate to call.

Sincerely,

Corning Natural Gas
